PROFESSIONAL SUMMARY

Full Stack Developer with 2.5+ years of professional experience building production-grade web applications using TypeScript, GoLang, NestJS, and React. Delivered microservices architectures with measurable impact — 40% faster API response times, 90%+ test coverage, and zero-downtime deployments. Hands-on experience integrating AI APIs (OpenAI, Gemini), managing cloud infrastructure with Docker and Kubernetes, and shipping subscription-based SaaS products end-to-end.

TECHNICAL SKILLS

- **Languages:** GoLang, TypeScript, JavaScript
- **Frameworks & Libraries:** NestJS, Fastify, React, Node.js, Redux
- **Databases & Caching:** PostgreSQL, MongoDB, Redis, TypeORM
- **DevOps & Cloud:** Docker, Kubernetes (k3s/kubectI), CI/CD, AWS, Azure, GCP, Linux Server Administration
- **AI & ML:** OpenAI API, Gemini API, RAG (Retrieval-Augmented Generation), Ollama, LM Studio
- **Concepts & Tools:** RESTful APIs, Microservices Architecture, System Design, JWT/OTP Authentication, Git, Netgsm Integration

PROJECTS

Muzigin.com — AI Music Platform

muzigin.com

Lead Full Stack & Backend Engineer (Personal Project)

Feb 2026 – Present

- Built the core backend architecture from scratch using NestJS and TypeScript, serving 5+ frontend modules with REST APIs and reducing average response time to under 200ms.
- Integrated 4 external AI and audio APIs (Sonauto, Gemini, AudD, Replicate), enabling automated music generation and copyright validation for 100% of uploaded content.
- Designed a multi-layered security system with JWT, OTP authentication, AES-256 encryption, CORS policies, and rate limiting, achieving zero security incidents post-launch.
- Authored 159 unit tests across 13 test suites, reaching 90%+ code coverage for Auth, Content, AI, Cache, and JWT services.
- Implemented the Param payment gateway, processing monthly and annual subscriptions with a 99.5%+ transaction success rate.
- Deployed on a k3s cluster using kubectI, ensuring 99.9% uptime and zero-downtime database migrations.

PROFESSIONAL EXPERIENCE

Kartelam
Full Stack Developer

Istanbul, Turkey
May 2023 – Dec 2025

- Led full-stack development of 3+ microservices using ReactJS and GoLang, reducing API response times by 40% through streamlined Service-Repository-API layering.
- Developed an AI-powered chatbot with OpenAI API, handling 100+ daily user queries with context-aware responses and 50%+ user satisfaction.
- Built advanced product filtering APIs using AI parsing, extracting precise parameters from complex queries and improving search accuracy by 60%.
- Refined frontend state management with Redux, reducing unnecessary re-renders by 30% and improving page load performance.
- Architected MongoDB data models across 5+ collections, consolidating 3 legacy APIs into a single unified microservice.

EDUCATION

Istanbul Aydin University
Associate Degree in Computer Programming (English-Medium)

Istanbul, Turkey
Sep 2022 – Jul 2025

LANGUAGES

- **Turkish:** Native
- **English:** Upper-Intermediate (B2)
